*Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a purified decoy probe comprising: a first nucleotide base recognition sequence region, wherein the first region binds to an RNA polymerase., and an optionally present second nucleotide base recognition sequence region provided that the second region is either directly joined to the 5' end of the first region or is joined to the 3' end or 5' end of the first region by a non-nucleotide phosphorothioate linker,

further provided that if the first region is nucleic acid which can be used to produce a functional double-stranded promoter sequence using a complementary oligonucleotide wherein the first region does not have a nucleic acid sequence greater than about 10 nucleotides in length joined directly to the 3' end of the first region.

Although, Kacian et al. (U.S. Patent 5,554,516) (September 10, 1996) teaches an RNA polymerase promoter and primer modified by non-nucleotide phosphorothioate linker at the 3'-end of the promoter, joining of the primer to the 5' end or to the 3' end of the promoter by a non-nucleotide phosphorothioate linker have neither been suggested or disclosed in any prior art of record.

In view of the absence of either teaching or suggestion of such a purified decoy probe comprising: a first nucleotide base recognition sequence region, wherein the first region binds to an RNA polymerase., and an optionally present second nucleotide base recognition sequence

Art Unit: 1634

region provided that the second region is either directly joined to the 5' end of the first region or is joined to the 3' end or 5' end of the first region by a non-nucleotide phosphorothioate linker,

further provided that if the first region is nucleic acid which can be used to produce a functional double-stranded promoter sequence using a complementary oligonucleotide wherein the first region does not have a nucleic acid sequence greater than about 10 nucleotides in length joined directly to the 3' end of the first region, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun Chakrabarti, Ph.D., whose telephone number is (703) 306-5818. The examiner can normally be reached on 7:00 AM-4:30 PM from Monday to Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones, can be reached on (703) 308-1152. The fax phone number for this Group is (703) 305-7401. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group analyst Chantae Dessau whose telephone number is (703) 605-1237.
